I encourage you to corner a few students and bring them to the conference. While some of us have reached the age of Jaded, our youngsters have not. The ASHS Southern Region conference is the perfect place to “hook” a youngster on the joys of our chosen field. It’s all about plants, plans, and people. Horticulture for many of us is more than a job, it’s a lifestyle. If each of you made it a mission to bring a few students along, ASHS Southern Region could return to the glory days of an ACB brimming over with students. In an age of stagnant or declining enrollments, it’s our duty.

The annual meeting is a time to catch up with friends and colleagues. After every annual meeting, I return home full of hope, good cheer and an air of optimism. It’s nice to know you’re not the only one dealing with obstacles, challenges and an unruly administrator two. Never doubt that those quiet conversations at ASHS Southern Region can teach you all kinds of academic survival tricks. While the meetings, presentations and workshops are great and there’s much to learn, it’s connecting with colleagues informally that may be the best return on our dollar. There’s nothing like a Super Bowl party at Orlando – particularly if you choose to hang near the Aggies or that LSU bunch – it has much to do with my reputation as fearless.

All the details for registration and hotels are available on the ASHS-SR website <http://srashs.org> - and in the newsletter. With academic budgets tight, there’s good reason to plan on a roommate or two. With the busy conference schedule, there’s little reason to hang out at the room. Of course, for those of you going super economy class, a few clicks on the internet can find you a nearby lower cost motel.

Note from the President

ASHS Southern Region meetings have been a ritual for my students and I for more years than I want to count. For the southern to east coast meetings, I’ve long ago given up on the idea that loading a couple of vans to grind out

21 hours of road time is really all that much fun. I almost always returned from those treks vowing never ever to do it again. However, time erases the rough edges and sure enough the next year I’d find myself cajoling students and dealing with details to lead a band of young citizens to some Holy Land of Southern Horticulture meetings. Now that I’m an old timer, I fly.

About the 2013 Annual Meeting

Notes to Paper Presenters

Oral Paper Presentation Format:

Presenters must bring their presentation(s) as a Power Point presentation saved on a USB memory device. It is advisable to bring your presentation on at least two storage devices for redundancy. If you would like to bring your presentation on any other storage form (Zip, Jazz, SD, CD, etc.), check with the Chair ahead of time to make sure their computer will accept that form.

Poster Preparation Instructions

Size, Format and Font. Poster presentations must fit with a 48" x 48" size. Abstract titles, names, and affiliations should appear on the top of the poster. A simple sans serif-face font (e.g., Helvetica) should be used. Lettering for the title should be at least one inch tall. Lettering for text

and illustrations should range in size between 6 mm and 12 mm. The author's names and affiliations may be somewhat smaller. Authors are urged to include photographs to assist in author identification.

Content. Do not prepare a poster as if it were a manuscript. Primarily, use tables and figures and use limited verbiage. Details of the work can be provided in discussions with interested parties.

Display. Mount your poster in the numbered space on the poster boards that is the same as your poster number in the program. Push-pins or Velcro buttons may be used to hang posters. Pins/Velcro must be supplied by presenter—they will not be available on-site.

Poster Competition. Undergraduate and graduate students wishing to participate in the poster judging competition must have signed up for the competition at the time they submitted their titles to the Chair of the Poster Section. Limited numbers may be accepted at the meeting; check with the registration table.

Abstract Preparation Instructions:

In order to publish abstracts: 1) one of the authors must be registered for the SRASHS conference (or one of the other SAAS groups), 2) the paper or poster must be presented in a conference session, and 3) the title must appear in the Conference Program. Prepare abstracts according to the "Instructions for Submission of Abstracts for Publication in *HortScience*" form at the end of the Newsletter. You also can obtain the instructions on the Forms link of the Southern Region web site: <http://srashs.org/forms/forms.html>. Each abstract must be submitted as a separate Word (.doc) file. If you use another word processing language, save and submit the abstract as a rich text format (.rtf) file.

Email your abstract to the Chair before the meeting or you may submit the abstract in a file format to the Chair at the meeting. The Chair may give a few days grace period to send the abstract by email after the meeting. To be published, all abstracts must be formatted properly.

Notes to Section Chairs and Judges

Section Chairs: The Section Chairs are responsible for bringing a laptop computer and projector for their Sections. If this is a problem, contact the Secretary-Treasurer immediately.

Judges:

ACB Advisor: Arranges judges for the J. Benton Storey Judging Contest.

Collegiate Branch Section Chair: Arranges judges for the Edmund Undergraduate oral presentations.

Poster Section Chair: Arranges judging for the undergraduate and graduate National Cowpea Poster judging.

President-Elect and Chair Graduate Oral Presentations: Arranges judges for the Childer Masters and Barham PhD graduate oral presentations.

Chairs collect abstracts:

All Chairs collect abstracts at the meeting or give the presenters a few days to submit abstracts to the Chair by email. The Chairs send abstracts to Ruth Gaumond at rgaumond@ashs.org by February 15, 2013. In order for an abstract to be published:

- The abstract title must appear in the Conference Program.
- The paper must have been presented orally or as a poster at the meeting.
- One of the authors must be registered for the conference.
- The abstract must be formatted properly.

Instructions for Submission of Abstracts for Publication in *HortScience*

To Publish your Abstract in *HortScience*:

- The abstract title must appear in the Program.
- The paper must have been presented orally or as a poster at the meeting.
- One of the authors must be registered for the conference.
- The abstract must be formatted properly.

Submission of Abstract

File Format: Each abstract must be submitted as a separate Word (.doc) file. If you use another word processing language, submit abstract in rich text format (.rtf).

Deadline:

- 1) At meeting: Give disk with file to the Chair of the session.
- 2) Email abstracts as an attached file to the Chair of the session prior to the meeting or within a few days after the meeting. See the Program for the Chair's email address.

Abstract Format

Length: Limit the abstract body to about 2000 characters.

Font: 12 point, Times New Roman or similar

Format: Format abstract as below. Asterisk denotes presenting author.

Molecular Marker-Derived Genetic Similarity Analysis of a Segregating Blackberry Population

Eric T. Stafne*¹, John R. Clark¹, and Kim S. Lewers²

¹316 Plant Sciences, Department of Horticulture, University of Arkansas, Fayetteville, AR 72701, ²USDA-ARS Fruit Lab, 10300 Baltimore Ave., BARC-West Bldg. 010A, Beltsville, MD 20705

A tetraploid blackberry population that segregates for two important morphological traits, thornlessness and primocane fruiting, was tested with molecular marker analysis. Both randomly amplified polymorphic DNA (RAPD) and simple sequence repeat (SSR) markers were used to screen a population of 98 genotypes within the population plus the two parents, 'Arapaho' and 'Prime-Jim'[®] (APF-12). RAPD analysis averaged 3.4 markers per primer, whereas SSR analysis yielded 3.0 markers per primer pair. Similarity coefficient derived from the Dice index averaged over all individuals was 63% for RAPD markers, 73% for SSR markers, and 66% for RAPD and SSR markers together. The average similarity coefficients ranged from a high of 72% to a low of 38% for RAPD markers, 80% to 57% for SSR markers, and 73% to 55% for both. Comparison of the parents indicated a similarity of 67% for RAPD markers, 62% for SSR markers, and 67% for both. This is similar to a previous study that reported the similarity coefficient at 66%. Although inbreeding exists within the population, the level of heterozygosity is high. Also, evidence of tetrasomic inheritance was uncovered within the molecular marker analysis. This population will be used to identify potential markers linked to both morphological traits of interest. Further genetic linkage analysis and mapping is needed to identify any putative markers.

Tentative 2013 Program-at-a-Glance

The exact times may change a bit as titles are added and/or deleted, but the day, blocks of time, and room locations should remain the same. The final Program will be emailed before the meetings and hard copies will be distributed at the meeting.
